"Delivering Engineering Solutions"

Introduction

United Inframech is a premier provider of **mechanical fabrication**, **hot and cold insulation services**, and **comprehensive engineering solutions** across India. With years of industry experience and a team of highly skilled professionals, we are committed to delivering outstanding results that drive success for our clients.

At United Inframech, **quality**, **innovation**, and **customer satisfaction** are at the core of everything we do. We specialize in delivering **end-to-end engineering and service solutions**, meticulously designed to meet the most demanding industrial and commercial requirements. From concept to execution, our services are tailored to ensure operational excellence, energy efficiency, and long-term reliability for every project.

We take pride in combining **cutting-edge technologies**, **advanced fabrication techniques**, and **expert craftsmanship** to achieve superior outcomes. Our ability to handle complex projects — with precision, timeliness, and cost-effectiveness — has earned us the trust of a diverse clientele spanning multiple industries.

As a full-service engineering partner, we offer some of the **best engineering services** in the industry, including:

- Customized mechanical fabrication and erection
- Precision piping and structural fabrication
- Advanced hot and cold insulation systems
- Turnkey project execution and mechanical maintenance
- Specialized industrial services and energy-saving solutions

Our team of engineers, project managers, and skilled technicians work closely with clients to understand their unique challenges and develop customized strategies that deliver measurable value. With a strong focus on safety, environmental responsibility, and continuous improvement, United Inframech stands ready to support industries in achieving their operational goals.

United *inframech* – *Engineering Excellence. Reliable Solutions. Proven Performance.*

Mission Statement

At **United Inframech**, our mission is to **deliver reliable, efficient, and innovative engineering solutions** that create lasting value for our clients, partners, and the communities we serve.
We are committed to setting new standards of excellence by combining advanced technologies, superior craftsmanship, and a deep understanding of our clients' needs.

Our goal is to provide end-to-end solutions that not only meet but exceed expectations — ensuring every project is executed with precision, safety, and sustainability at its core.
We strive to build long-term relationships based on trust, transparency, and mutual growth, while constantly evolving our services to meet the ever-changing demands of the industries we serve.

Through continuous improvement, a focus on quality, and a passion for innovation, **United Inframech** aims to be the trusted partner of choice for mechanical fabrication, insulation services, and comprehensive engineering solutions across India and beyond.

Vision

At **United Inframech**, our vision is **to become the most trusted and respected name in mechanical fabrication, insulation services, and engineering solutions** — not just across India, but in global markets as well.

We aspire to lead the industry through a relentless commitment to **excellence, innovation, and integrity**, setting new benchmarks in quality, safety, and client satisfaction.
Our goal is to be recognized as a driving force behind industrial success stories — delivering world-class engineering solutions that empower businesses to perform more efficiently, sustainably, and competitively.

We envision a future where **United Inframech** is synonymous with **engineering excellence**, **reliable partnerships**, and **progressive solutions** that meet the evolving needs of industries worldwide.
By fostering a culture of continuous improvement, investing in cutting-edge technologies, and nurturing long-term relationships, we aim to inspire trust, deliver exceptional value, and leave a positive impact on every project and partnership we touch.

Together, with our clients, partners, and dedicated workforce, we are building a future defined by innovation, leadership, and limitless possibilities.

Our Services

Mechanical Fabrication:
United Inframech provides expert mechanical fabrication services, offering customized solutions for industrial structures, ducting systems, pipelines, supports, tanks, and equipment assemblies. With a strong focus on precision, strength, and compliance with industry standards, we deliver fabrication works that ensure maximum operational performance and long-term durability for a wide range of industrial sectors.

Hot and Cold Insulation:
We offer specialized insulation services to optimize energy conservation and protect systems across different temperature ranges. Our **hot insulation** solutions are designed for high-temperature pipelines, vessels, and equipment to prevent heat loss and ensure system safety. Our **cold insulation** services prevent condensation, protect against moisture ingress, and ensure efficiency in refrigeration, cryogenic, and chilled water systems. We use advanced materials and techniques to guarantee thermal performance, durability, and environmental sustainability.

Engineering Services:
United Inframech delivers comprehensive engineering services that span from project planning and design to on-site execution and maintenance support. Our experienced engineering team collaborates closely with clients to develop customized, cost-effective solutions that align with operational goals, regulatory standards, and project timelines. Whether it's mechanical installations, system integration, structural support, or maintenance planning, we ensure seamless project delivery with a strong focus on quality, safety, and efficiency.

Trading:
To meet the diverse needs of our clients, United Inframech is also engaged in the supply and trading of high-quality industrial products, materials, and equipment. We provide reliable sourcing of insulation materials, fabrication accessories, HVAC components, and mechanical parts, ensuring timely availability and superior quality. Our trading services help streamline project execution by offering one-stop procurement solutions that save both time and costs for our clients

Industrial HVAC Solutions:
We specialize in delivering robust and energy-efficient HVAC systems for industrial environments, ensuring precise temperature control, enhanced air quality, and reliable performance under demanding operational conditions

Metal Ducting:
We design, fabricate, and install high-quality metal ducting systems that ensure efficient air distribution, durability, and compliance with industrial performance and safety standards.

Fabric Ducting:
Our fabric ducting solutions offer lightweight, energy-efficient, and hygienic air distribution, ideal for controlled environments like food processing, pharmaceuticals, and commercial facilities.

Core Values

Integrity:
We believe that trust is the foundation of every successful relationship. At United Inframech, we conduct all our business activities with the highest standards of honesty, transparency, and ethical behavior, ensuring that we uphold our commitments and build lasting credibility with clients, partners, and employees.

Innovation:
In a rapidly changing world, innovation is key to staying ahead. We are committed to pioneering new methods, materials, and technologies to provide forward-thinking engineering solutions. By embracing creativity and encouraging new ideas, we constantly push the boundaries of what's possible for the benefit of our clients and the industries we serve.

Quality:
Excellence in craftsmanship is the hallmark of our services. We set uncompromising standards for quality across every aspect of our work, from material selection to project execution. Our focus is to deliver products and services that consistently meet — and often exceed — client expectations for durability, performance, and reliability.

Customer Focus:
At the heart of United Inframech is a deep commitment to understanding and fulfilling client needs. We prioritize customer satisfaction by offering tailored solutions, responsive communication, and proactive problem-solving. Our client-first approach ensures that every project is not just completed, but completed with excellence and care.

Sustainability:
We recognize our responsibility toward the environment and future generations. United Inframech is dedicated to promoting eco-friendly practices, implementing energy-efficient technologies, and designing sustainable solutions that minimize environmental impact while maximizing operational efficiency for our client

Our Service Team

At **United Inframech**, we believe that the strength of our service lies in the capability and commitment of our people. We maintain a **highly skilled, experienced, and dedicated service team**, ensuring that every project — no matter the size or complexity — is executed to the highest standards of quality, safety, and efficiency.

To provide hands-on leadership and immediate problem-solving at the ground level, we **depute qualified supervisors directly at project sites**. These site supervisors are empowered to oversee day-to-day operations, ensure adherence to project specifications, enforce safety protocols, and maintain smooth communication between the client and our internal teams.

All our site employees and supervisors are **fully covered under the ESI (Employee State Insurance)** and **PF (Provident Fund)** schemes, reflecting our strong commitment to compliance with statutory labor laws and dedication to employee welfare. We firmly believe that a secure and well-supported workforce is fundamental to delivering exceptional service outcomes.

We also invest heavily in continuous training, safety programs, and skills enhancement initiatives to ensure that our teams stay updated with the latest industry standards, fabrication techniques, insulation practices, and engineering solutions. Our workforce is not only technically competent but also deeply committed to upholding the values of professionalism, teamwork, and client satisfaction.

Through a combination of **technical excellence**, **on-site leadership**, and **employee-focused policies**, **United Inframech** ensures that our service delivery consistently meets and exceeds client expectations, project after project.

Industries We Serve

Power and Energy:
United Inframech supports the power generation and energy sectors with precision-engineered mechanical works, insulation systems for thermal management, and maintenance services that optimize plant performance and longevity.

Manufacturing and Heavy Industry:
Our solutions cater to the dynamic needs of manufacturing units and heavy industries, offering robust mechanical fabrication, industrial insulation, and engineering services that ensure efficient operations, energy conservation, and regulatory compliance.

Food Processing and Storage Facilities:
We deliver tailored insulation and fabrication solutions that help food processing plants and cold storage facilities maintain precise temperature control, improve energy efficiency, and comply with stringent hygiene and safety regulations.

Commercial Infrastructure:
United Inframech extends its expertise to commercial infrastructure projects, delivering HVAC installations, mechanical fabrication, insulation works, and engineering services for malls, office complexes, logistics hubs, and commercial buildings — ensuring performance, comfort, and sustainability.

Pharmaceutical and Healthcare Facilities:
We support the pharmaceutical and healthcare industries with specialized insulation, HVAC systems, and mechanical services that ensure controlled environments, critical system reliability, and strict compliance with health and safety standards.

Textile and Paper Industries:
Our solutions for textile and paper plants include customized mechanical fabrication and energy-efficient insulation, helping clients optimize production processes, reduce operational costs, and enhance product quality.

Metals Industries:
United Inframech offers durable and high-performance mechanical and insulation services to the metals , ensuring system efficiency, heat management, and safety in harsh and challenging operational environments.

Why Choose Us?

End-to-End Engineering Solutions Under One Roof:
At United Inframech, we provide comprehensive services encompassing mechanical fabrication, insulation, engineering, trading, and HVAC solutions — all managed under a single roof. This integrated approach ensures seamless project coordination, reduces complexities, and offers clients the convenience of working with a single trusted partner for all their industrial needs.

Highly Trained Technicians and Engineers:
Our team comprises highly skilled technicians, certified engineers, and experienced supervisors who bring deep industry knowledge and technical expertise to every project. Through continuous training and skill development programs, we ensure that our workforce stays ahead of industry advancements and is fully equipped to deliver world-class solutions.

Strict Adherence to Quality and Safety Standards:
Quality and safety are the cornerstones of our operations. We follow stringent quality control measures, rigorous inspection protocols, and internationally recognized safety practices to ensure that every project we undertake meets the highest standards of excellence, regulatory compliance, and operational safety.

Timely Project Delivery with Cost-Effective Solutions:
We understand the value of time and budget in every project. United Inframech is committed to delivering projects within agreed timelines while maintaining cost-effectiveness without compromising on quality. Our efficient project management strategies, proactive risk mitigation, and transparent communication ensure smooth execution and client satisfaction.

Customized Approaches for Every Client Requirement:
We believe that no two projects are the same. That's why we adopt a highly customized approach for each client, tailoring our solutions to fit specific project demands, operational goals, and budget considerations. Our flexible and client-centric methodology allows us to address unique challenges and deliver solutions that truly add value.

Our Projects

Nestlé India:
United Inframech has been a trusted service partner for various Nestlé plants across India. Our work includes:

- **Complete pipeline insulation systems** for process lines, chilled water systems, and utility pipelines.
- **Metal ducting installation** for HVAC and ventilation systems, ensuring optimal air management and hygiene compliance in production areas.
- **Metal fabrication** of customized platforms, equipment supports, and structural works tailored for food-grade operational standards.
- **Supply of HVAC machines** and associated accessories, ensuring efficient climate control within critical production, storage, and packaging zones.
- **Pipeline Projects:** Installation of high-quality pipelines for process fluids, utilities, and compressed air systems, designed for maximum operational efficiency and reliability.
- **HVAC Machine Supply and Installation:** Sourcing and supplying energy-efficient HVAC equipment to Nestlé facilities, including installation, commissioning, and system balancing to ensure peak performance.

Each project was delivered under stringent quality control norms, with a strong emphasis on maintaining Nestlé's global operational standards for food safety, energy efficiency, and sustainability.

TVS Utility Facility:
United Inframech completed **heavy fabrication of structural units** at the TVS Utility facility. This included fabrication and installation of industrial platforms, piping supports, and utility structures, executed with precision workmanship, top-grade materials, and strict adherence to engineering specifications.

HUL (Hindustan Unilever Limited) Fabric Ducting Project:
We successfully executed a **fabric ducting project** for Hindustan Unilever Limited (HUL), providing advanced textile-based air distribution systems. The solution offered uniform air dispersion, energy savings, ease of maintenance, and a hygienic environment, supporting optimal operational conditions for sensitive production lines.

And Many More Across Industries:
In addition to our key projects, **United Inframech** has successfully completed numerous assignments across a wide range of industries — including power generation, chemical processing, pharmaceuticals, textiles, warehousing, and commercial infrastructure.
From specialized insulation and mechanical fabrication to full-scale HVAC installations and equipment supply, we continue to serve diverse sectors with the same commitment to quality, safety, and innovation.
